

Notification Framework

Group - 18

Sprint - IV

SMS Channel Implementation

Completed implementation of SMS channel with automatic segment splitting and channel-aware content processing capabilities.

Automatic Segment Splitting

Divides messages into
multiple segments
when it exceeds
maximum character
limits

Channel-Aware Processing

Optimizes content
based on the specific
distribution channel
used.

Admin Dashboard Improvements

Enhanced admin dashboard with provider settings and consolidated page management.

Provider Settings Page

New dedicated page for managing provider configurations

Merged Logs & Activity

Combined Logs/Activity and Job Explorer into unified interface

Hyperlinked References

Jobs and tasks now link to corresponding user IDs for better traceability

Optimized rate limiting, queue management, and backend integration for improved system consistency.

Rate Limit Consistency

- Aligned rate limit values across all channels for uniform behavior

Queue Management

- Removed queue control page and added view button in queue stats page

Backend Integration

- Integrated hardcoded rate limit values from backend to frontend

Code Logic Improvements

TECHNICAL ENHANCEMENTS

Implemented critical backend improvements including optimized job processing, analytics fixes, and automated token management.

Job Processing Optimization

Modified job creation to handle multiple recipients and channels efficiently

Analytics & Rate Limiting

Fixed failure analytics dashboard and resolved rate limit integration errors

Token Management

Removed manual token refreshing and implemented automatic token refresh mechanism

Challenges & Final Submission

PROJECT COMPLETION

Successfully completed implementation of all three communication channels (Email, WhatsApp, and SMS) with full integration and testing.

Email Channel

Fully implemented with complete feature set

WhatsApp Channel

Fully implemented with complete feature set

SMS Channel

Fully implemented with complete feature set

📌 **Key Achievement:** All three notification channels are production-ready and fully integrated into the notification framework.

Thank You
